JOSIAH TURNER, Jr., EDITOR.

THE CRIME AND FOLLY OF EMANCIPATION.

The Toledo *Commercial* comments thus on something which it saw in the *North-West:*

The pictures well illustrate the great fact of Emancipation, which marks so important an era in our nation's history. Millions of poor bond men and bond women have under the invitation and guaranty of the Government, thus turned their steps toward the genius of Liberty, and not in vain. They may not be as "pretty," in the sense meant by our exchange, but they constitute the grandest procession that the world ever saw. It may have no attraction for pro-slavery eyes; but it will long challenge the admiration and joy of the friends of freedom every where."

The time is approaching when the "great fact of Emancipation" will be adjudged by a public mind grown impartial and candid in the light of the consequence s which have flowed therefrom to both races. It will be seen that an inconsiderable people have sacrificed to a mere *sentiment*—a whim, a fantasy, an hallucination—the well being, nay, the very existence of four millions of helpless and dependent persons. Bellow "pro slavery" to your heart's content. We tell you the truth; and we abide the honest verdict of mankind.

You have given the poor negro Liberty—liberty to steal, to starve, to die out before that inevitable extermination which has overtaken the Indian, and which awaits the black man with the certainty of fate.

For the barbarities and cruelties of the servile relation we are no apologist, any more than for the crimes which are sometimes perpetrated in the relations of husband and wife, parent and child. None abhorred a cruel slaveholder more than we; but cruelty was the exception, and not the rule. The man who starves or tortures even a horse, or other dumb brute, is an exception.

As a whole, the negroes were well clad, well fed, well cared for; and in their way the American slaves were as happy and contented as any similar number of people on earth.

They were not fit for freedom; but it was forced on them. They now go out into the struggle of life, and in competition with the shrewdest, most energetic, most unscrupulous, avaricious and remorseless race of people on the globe. For this is the character of the Yankeized Anglo Saxons. Their old masters, who might have given them compassion, if not charity, are impoverished; and now as a race, the blacks are paupers. Without industry, save when constrained; without ambition; without skill; without education; destitute in a word of every capability for the new career assigned them, they are turned out to perish. Manna no more falls from heaven to succor the starving; alms-houses are not built for a whole race. Through destitution, disease, crime and suffering, the black man must follow the red man to extinction.

You gave him freedom; you propose to give him the ballot. But these will not give him bread, nor give him shelter, nor give him clothing, nor give him brains.

Had the negro been the white man's equal, slavery could not have existed, or could not have been perpetuated for any considerable time. Honest Republicans have treated the question as they would have treated it had it been a question between two races in intellect and in every sort of capability. This was their fatal error. Who could emancipate all the children under ten years of age?—turn them out of doors, and forbid parental control under severe penalty? And yet such an act would not be so cruel and so murderous as that we are considering; for such of the children as survived would be able to take care of themselves when they arrived at mature years. For the negro there is no maturity. However ferocious in passion, or brutal in strength, he is and must indefinitely remain a child in intellect.

Emancipation was an enormous crime; a crime against the country, for it destroyed its chief source of wealth; but more than all, it was a crime against the simple, dependent confiding people whom it has destroyed.

THE RISING OF THE WATER—A CALIFORNIA PHENOMENON.

From the San Francisco Alta September 4.

Among the curious phenomena of our climate none is so increditable and so mysterious as the rising of the spring in the very time when all theory would prove that our driest time should be just setting in for a long continuance. Yet everywhere, ere our long term of drought from dearth of rain has reached within sixty days of its termination, the springs, instead of growing more dry to the end, begin to grow permaturely moist, and water flows without rain where not a drop was seen a week before! When we read attentively this law of nature we shall see a beautiful provision that saves our trees and shrubbery from the destructive desiccation that befal s the herbage of the fields to the very roots. In other climates the counterplay of electric forces draws water from the upper air to feed the rooted plant by downward percolation. In California this action is simply reversed. There being no water above electric conduction finds play in drawing it from beneath. There is reason to believe that our soil has porosity corresponding to this process. In no other clime are the waters under the earth so abundant. They are saved from superficial evaporation by the habitude of our streams to sink underground and disappear from sight. Evaporation does not cease; but instead of being dissipated in the atmosphere direct it passes through the intervention of the earth, and in its passage it moistens all the pores and feeds the tree roots in its ascent. In the longest days and the hottest sunshine evaporations takes away the ascending surplus from the surface so fast that none remains to show flow upon the ground. In the latter days of August this sun power and the length of days decline. August is also our month of fogs. The grain bearing herbage is dried up or cut down, and the pores it kept open are glazed over and impervious to vapor from beneath. Everythings conspires to check the needless waste of water through the air. And thus it is that in our lengthening night time there remains a surplus to give flow to the surface springs. Blessed be Providence for this kind provision, by which as the lengthening drought threatens destruction, there comes from depths concealed increase of moisture, bringing to the earth resurrection of life and salvation.

DOTY'S WASHING MACHINE,

LATELY MUCH IMPROVED,

AND THE NEW

UNIVERSAL CLOTHES WRINGER.

Improved with ROWELL'S PATENT DOUBLE COG-WHEELS, and the PATENT STOP, are now unquestionably far superior to any apparatus for washing clothes ever invented, and will save their cost twice a year, by saving labor and clothes.

Those who have used them give testimony as follows:

"We like our machine much; could not be persuaded to do without it, and with the aid of Doty, we feel that we are masters of the position."—*Rev. L. Scott, Bishop M. E. Church.*

"It is worth one dollar a week in any family."—*N. Y. Tribune.*

"In the laundry of my house there is a perpetual thanksgiving on Mondays for the invention."—*Rev. Theodore L. Cuyler.*

"I heartily commend it to economists of time, money, and contentment."—*Rev. Dr. Bellows.*

"Every week has given it a stronger hold upon the affections of the inmates of the laundry."—*N. Y. Observer.*

"Friend Doty—Your last improvement of your Washing Machine is a complete success. I assure you 'our machine,' after a year's use, is thought more of to-day than ever, and would not be parted with under any circumstances."—*Solon Robinson.*

"Your Washing Machine has been in daily use in our laundry and the housekeeper expresses herself as highly pleased with it. It certainly accomplishes a greater amount of work, with less labor, and does not wear the clothes near so much as the old fashioned warsh-board. By using it one laundress is dispensed with."—*Wm. M. F. Round, Superintendent of Infant Department of St. Catherine's Nursery, N. Y. City.*

PRICES.—A Fair Offer.

Send the retail price Washer $14, Extra Wringer $9, and we will forward either or both machines, free of freight, to places where no one is selling; and so sure are we they will be liked, that we agree to refund the money if any one wishes to return the machines, free of freight, after a month's trial, according to directions.

No husband, father or brother should *permit* the drudgery of washing with the hands, fifty-two days in the year, when it can be done better, more expeditiously, with less labor, and no injury to the garments, by a Doty Clothes Washer, and a Universal Wringer.

Canvassers with exclusive right of sale make money fast selling them.

THE SENTINEL.

JOSIAH TURNER, Jr., EDITOR.

FRIDAY, SEPTEMBER 24, 1869.

ROCKINGHAM COURT.

We spent two days at this Court now in session. The Judge, Tourgee, arrived at 10 o'clock, P. M., instead of 10 o'clock, A. M., on Monday. Solicitor Balla was on time, as Railroad men say.

Hon. Henry Morehead, the father of the Bar, made his appearance on Monday, driving a fine war stallion. This horse had borne James Morehead, *Jr.*, who fell at Gettysburg, in the vanguard of many a fight.

The Bar of Rockingham numbers among its members some of the ablest lawyers of the State. Among them are Judge Kerr, Judge Ruffin, Jr., Gen. Scales, Col. Robert B. Watt, Hon. S. P. Hill, Col. Dillard, Col. James T. Morehead, Col. A. J. Boyd, Capt. Robert Ward, John R. Winston, Col. E. B. Withers, Col. J. J. Scales, Capt. E. D. Scales, and last but not least, our young friend, Joseph Morehead, who has just made his debut at the Bar. Eloquence at least might be expected of the Rockingham Bar, as two of the grand sons of Patrick Henry practice there.

The venerable Chief Justice Ruffin was seen on the Court green, shaking hands with warm friends and admirers who greeted him with a hearty welcome.

Among the worthy and the notables of Rockingham we saw Governor Reid, looking but little older than he did when Governor, in 1852, his brother, Mr. Hugh Reid, Dr. Travers Broadnax, Major John Broadnax, Robt. Lawson, Esq., Dr. Scales, Gen. Simpson, Thomas Galloway, Esq., Major Bethel, Dr. Carter, Major Holderby, George L. Aken, Esq., and many others.

There was an immense number of people in attendance on Monday, all looking for the Judge, who did not come. There must have been 500 people who were attending under compulsion of law and necessity, some as witnesses, others as parties, plaintiffs or defendants. There were 111 defendants on the State docket alone. If any one of the 500 had been called on Monday and failed to answer, the Judge would have fined him. There should be a penalty on the Judge for failing to answer on Monday, when so many were calling and looking for him. In the better days of the Republic, and during our attendance on Court for a period of twenty and five years, we have never known a Judge to be absent on Monday of the term. If the people are punished for absence without excuse, why not punish the Judge who, without excuse, absents himself.

Notice, for us to speak on Tuesday, had been given out over the county. The Judge being at sent and the people desiring it, we spoke on Monday.

Official villainy is as common in Rockingham as in Raleigh, and differs only in degree—that of Rockingham being on a smaller scale.

Guilford county was divided into 18 townships, at a cost to the county of only $925.80.

Rockingham has only 7 townships, made at a cost of $2,971.20. The Register and Assistant Clerk charge for services $890.76. The Conservative Assessors of 1868 charged only $188.50 for assessing the property of the county. The mixed Assessors, negro and scalawag, of 1869, charged $774. The whole tax now to be collected is $37,000. The debt of the county is $49,000. This tax, high as it is, will not be sufficient to meet the demands upon the Treasury.

John C. Wall, who is poor, works hard and makes fine tobacco, told us his tax last year was $3,86, this year, upon the same property, it was $27.

The tax, the County Commissioners and Judge Settle's bridge, are the all absorbing topics of conversation.

A more aroused and indignant people cannot be found on this continent, unless it be in Orange and the other counties of the State, where the people have for four years borne quietly the offensive and detestable carpet-bag rule, which has been forced upon them by the sword of the merciless conqueror. We advised the people of Rockingham to give their Commissioners specac, as Meninger, the Secretary of State, did the little negro who stole the cake.—Ipeese would make them throw up their ill gotten gain—they have at least $1,900 dollars more than they are justly entitled to, for there was no reason why the Commissioners of Rockingham, should charge more than the Commissioners of Guilford, especially when eighteen Townships were laid off in Guilford and only seven in Rockingham.

Groom, one of the Commissioners and recent Chairman of the Board, was recently arrested charged with offering two negroes of the League ten dollars to burn the house of certain gentleman, whose politics were offensive to Groom and the League. We had some discussion with Commissioner Groom; the boys and young folks of the meeting were not willing to hear him, but we bid them be silent as I hear him, for not to do so would be to imitate Judge Settle, who refused to hear Gen Scales and Col. Dillard. We have most of the evidence taken before the Magistrate in the case of Commissioner Groom, charged with offering ten dollars to two of his brother League negroes to burn the dwellings of his neighbours. This evidence shall be published in a few days, for it will go far to show the evil purposes and hellish designs of the secret oath bound Leagues. We heard as we left Westworth, that Judge Settle said he understood the tendency of our speech was to lead to the assassination of himself and Tourgee the Judge. We need not say the Judge was misinformed, Groom must have informed him. We have a new pocket knife, but God knows we have no disposition to blunt its edge by cutting any such Judicial carcass. A worthy old gentleman of Rockingham commended us for our moderation. When we consider the provocation we have had, we are astonished at our moderation under secret and public attempts to assassinate us.

A DIFFERENCE.

The *Standard* and Mr. Treasurer Jenkins differ as to the amount of *valid* appropriations made by the present Legislature. The "organ" of the 23rd gives, what it calls, a "correct list" of appropriations, amounting in the aggregate to $13,029,000.

Mr. Treasurer Jenkins, in his first explanatory letter to the SENTINEL, which appeared on the 15th inst., says: "The total amount of new bonds authorized by the General Assembly for Railroads, not pronounced unconstitutional, is about $16,300,000." He, in the same letter, gives the amount of appropriations declared unconstitutional by the Courts, as $9,850,000. In his second letter, which appeared in the SENTINEL on the 20th, he alludes to the valid appropriations again, in round numbers, as "$16,000,000."

RECAPITULATION.

Amount of appropriations made by the Legislature and considered valid, in round numbers, according to Treasurer Jenkins,	$ 16,000,000
Amount of appropriation made by the Legislature, in round numbers, according to the *Standard*,	$ 13,000,000
Difference between the Treasurer and the "Organ,"	$ 3,000,000

Somebody has made a mistake, wittingly or unwittingly. Is it the *Standard* or the Treasurer, whose business it is to know all about these things? Three millions of dollars may appear a small matter in the estimation of the "organ," but the people who pay the taxes will estimate it differently. That sum would have paid the Government expenses of North Carolina in former times, under our good old system, for about *thirty years!*

Treasurer Jenkins says, in his first letter, that the amount of appropriations made by the Legislature, declared unconstitutional by the Courts, was $9,850,000. Put this with the $16 300,000, which he says is considered valid, and we have $26,150,000; the amount we said in our article of the 13th, had been appropriated by the Legislature for Railroads.

Neither Treasurer Jenkins, in his letter, nor the "organ," says one word about the Penitentiary appropriation, either among the valid or the invalid appropriations!

Now, a word about this $16,000,000 *valid* appropriations: These bonds have been issued and put on the market, and sold, say at an average of 48 cents on the dollar. (For some time they were as low as 44½.) The 48 cents greenbacks are equal say to 32 cents in gold, but we will put the average at 35.

On $16,000,000, then, the State realizes	$5,600,000
The people are taxed to pay interest on $16,000,000 which at 6 *per cent.* amounts annually to	$960,000
The interest on what she realizes by the sale of her bonds at the same rate, would be	$336,000
So the State pays in interest, annually, *on nothing*	$624,000

And must eventually redeem bonds, on which she realizes *nothing*, to the amount of $10,400,000! In thirty years time, for which the bonds run she will pay in interest, on *nothing*, $18,720,000! which added to the above, makes the enormous sum of $29,120,000, which the Radical Legislature has saddled upon the State, for which she never will realize *one single cent*.

In addition to this exhibit, take from the $5,600,000, which is realized on the sale of the bonds, the *unknown amount* that finds its way into the pockets of the members of the "Ring," and you can form some idea, reader, of the amount of benefit the State is likely to derive from the onerous burden of taxation that has been imposed upon the tax payers of North Carolina!

But the above exhibit does not represent the whole facts in the case. These are only the *Railroad* appropriations. We have not said a word yet about the enormous expense you are called upon to pay for a horde of new and useless public officers; for the change in your system of Justice; unnecessary expenditures for militia campaigns; money paid for work that officials ought to, but cannot, perform; and a thousand other things, many of which we intend to bring out and hold up to the inspection and for the condemnation of the tax payers of this generation.

We shall probably revert to this subject again to morrow.

While Rev. Mr. Perry, a local Methodist preacher, was addressing a congregation at Columbia, Brazoria county, Texas, on the evening of the 8th instant, six armed desperadoes entered the church and fired at and killed him instantly. Rev. Mr. Hardwell, the minister in charge, who was sitting in the pulpit, was knocked down by one of the ruffians, but, as he is a very powerful man, he rallied and took the weapon away from his assailant. The assassins then ran out of the house. Seventy freedmen armed themselves and mounted in hot pursuit, with instructions from the United States marshal to bring the ruffians back, dead or alive. A terrible state of affairs is said to be existing in that section of the country.

A raiser of poultry in Louisiana has dug a well as the entrance of his hen houses, and placed a tilting cover over it. His catch averaged one negro a night.

The *English Churchman* mentions that the real reason why the annual ministerial whitebaite did not take place this year is that the Chancellor of the Exchequer and the First Lord of the Admiralty are so unpopular that they fear a street riot on the occasion.

A suit has been entered in the United States Circuit Court at New Orleans against Gen. Jas. B. Steadman, ex-Internal Revenue Collector for that district, and his sureties, by the United States District Attorney, for over $600,000, which amount, after the adjustment of accounts by the proper officers, is found to be due by Steadman as tax collectors to the government.

It is understood that Ben. Butler will early in the coming session of Congress, deliver a scathing speech on the extravagances of several congressional committees which have been travelling across the continent at Government expense. His remarks are expected to apply particularly to the Ways and Means Committee, of which Gen. Schenck is chairman. General Schenck is said to be prepared for his antagonist, having secured some most damaging facts against Butler's connection with certain manufacturing institutions.

NATIONAL ASYLUM FOR DISABLED SOLDIERS.—The Milwaukee Sentinel says:

"The managers of the national asylum for disabled volunteer soldiers will hold their next meeting at our branch, on the 27th inst. Lieut. Gen. Sheridan, Maj. Gen. Hancock and Pope, and other prominent officers, will be present, as well as the Governors of the several States. Among the officers is the Hon. Hugh L. Bond, Baltimore, Md. The new asylum building, just completed, will be opened at the stated time with appropriate ceremonies. A general invitation is extended to the friends of the soldiers everywhere to be present and take part in the exercises."

THE CUBAN LEADER.—Cespedes, the leader of the Cuban revolution, is thus described by an American gentleman who has returned from the Island:

"He is a man about 45 years of age; is a middling stout gentleman, of agreeable temper, and is quiet mild mannered. His complexion is fair, though of dark brown hair and eyes. There is no pretense about him. He is no talker, yet when he speaks it is to the purpose. He reads English well, and speaks it, though not fluently. At first view one would take him for a plain, quiet, unpretending gentleman; but on acquaintance he discovers sagacity, and a profound knowledge of men and of the world. It may be said that he is a man of eminent practical ideas. He is unmoved at reverses, and has a high, undoubting confidence in the success of the revolution. There is no gentleman more amiable than he, and none more beloved by everybody. Cespedes is a large property owner; was at the opening of the war the first lawyer at the Bayamo bar, and has been eminently successful in all his efforts and undertakings. He can endure much, for his physique is well adapted to labor, either mental or physical. Perhaps he would weigh 150 pounds.

THE SENTORIAL ELECTION IN VIRGINIA.

It would be difficult to compliment too highly the discretion of the Virginia State Conservative Committee in recommending that the Legislature take no steps towards the election of United States Senators until the State of Virginia is fully admitted to her rights in the Union. The reason assigned for this counsel is that Senators elected prior to the reception of the State would be chosen under such circumstances as would not render them the unbiassed choice of Virginia. The correctness of this position merits, as we have said, the highest approval; for it is not only a matter of interest, to Virginia, but to the country at large, that sound views should be pronounced and acted on in this behalf. The Senate, as we know, is the stronghold of Radical power; it is already stuffed with surreptitious members holding for long terms, and the only possible result of a Senatorial election by the Virginia Legislature, prior to the admission of the State, would be the reinforcement of these "reliable" Radicals by two votes. It is idle to say that Virginia could send two Conservatives able to take the test oath. They would not be admitted. The case of Mr. Joshua Hill, Senator elect from the State of Georgia, is a case in point. Mr. Hill asseverates his ability to take the test oath; but it so happens that his proclivities are known or suspected to be Conservative, and so to this day he has, on one pretext or another, been kept out. It is not test-oath Senators so much that Radicalism now insists on as it is that Senators should be wholly "reliable" in their votes. This, and not the test oath, is the present *sine qua non* of admission to the Senate. The rule, of course, is one that these factionaries do not dare to apply to the North; but so far as the South goes it is firmly the opinion that no Senators will be received from Georgia, Virginia, Texas, or Mississippi who are not known to be thoroughly certain to give the ultras their vote. In advising against a Senatorial election we are, therefore, satisfied the Richmond committee have done wisely, not only for Virginia but the other States as well. Once in, the State may elect whom she chooses; and while we do not think that even then the Senate will receive Conservative members—though able to take fifty test oaths—a rejection under such circumstances would be peculiarly odious before the people.

There must be, of course, in Virginia, a very great desire to see the State rehabilitated, and perhaps to some it may appear that even two more "reliable" Senators may not be too dear a price to pay for this possession. If such there be, it would be well for them to very seriously consider how all important is the election of an United States Senator at this juncture. A Senator going in *now* will hold to the year of the second Presidential election from this date. In all that time, irrespective of who may be elected President in 1872, or how the Congressional elections of 1870, 1872, 1874 may go, there he will sit, checking the President of 1872, if a Democrat, and bridling three several Houses, if Democratic. Already there are eighteen surreptitious members of the Senate. If Virginia sees fit to swell that number, Georgia, Texas, and Mississippi may follow her example and the upshot is over one-third of the whole body altogether alien, misrepresentative, and bogus. One-third of the Senate can do great things. It can be the balance of power, and the balance of power is *the* power, just as he who gives the casting vote determines the question. The Senate is, in fact, the vital point in this great controversy now pending between Radicalism and good government. In 1870 we may elect a Democratic House; in 1872 we may have a man to succeed the poor creature now in the White House; in every State election from 1869 to 1872 we may elect Democratic Governors and Democratic Legislatures, North and South, in place of Radicals; and yet, with a Senate stuffed with surreptitious six year Senators, what good will it do?

Let the Legislature heed the voice of the Richmond Committee. Better for Virginia—better for us all—that Virginia have no Senators than that she have such Senators as she will alone be permitted to have.—*N. Y. World.*

DIED:

In Concord, N. C., on Saturday, the 18th day of September, Mrs. MARY C. MONTGOMERY, wife of W. Y. Montgomery, in the 33rd year of her age.

Mrs. Montgomery was a woman whose loss is really felt by all who knew her. In all the relations of life, as wife, mother, and friend, she was an exemplary Christian. Regular in all the duties of piety, her daily walk was a testimony for Christ, and on a dying bed she was sustained by an unfailing trust in Jesus, her very last words being a statement that the grave of Christ was her stay, while she calmly looked forward to Heaven as her eternal rest.

NEW ADVERTISEMENTS.

UNIFORM SYSTEM OF

TEXT-BOOKS

FOR NORTH CAROLINA.

Office Publishers' Sup't of Introduction,
RALEIGH, N. C., Sept. 21, 1869.

A DEPOSITORY has been established at Raleigh, in charge of Mr. Alfred Williams, for the following books, which were adopted Aug. 9th, 1869, by the State Board of North Carolina for uniform use in the Public Schools:

PARKER & WATSON'S NATIONAL PRIMER.
PARKER & WATSON'S NATIONAL SPELLERS.
PARKER & WATSON'S NATIONAL READERS.
DAVIES' ARITHMETICS.
MONTEITH & MCNALLY'S GEOGRAPHIES.
MONTEITH'S YOUTH'S HISTORY OF THE U. S.
EAKIN'S SYSTEM OF PENMANSHIP.

THE NEW DESCRIPTIVE GEOGRAPHY OF NORTH CAROLINA will be ready about the middle of October next. The maps, &c., are now being engraved as rapidly as possible. This work will be furnished with Monteith & McNally's Series, without extra charge.

PROF. JEROME ALLEN'S COMPLETE SYSTEM OF MAP DRAWING will also be furnished to the Public schools with Monteith & McNally's Series, without extra charge.

The books will be supplied at exceedingly low rates to the Public Schools in the State.

Similar terms will be made accessible to private schools adopting the above named books uniformly.

Pupils attending the Public Schools will, in accordance with the State contract, be furnished with new copies of Monteith & McNally's Geographies and Davies' Arithmetics in exchange for old copies of Cornell's Geographies and Quackenbos' Arithmetics, which they may possess.

Books will be supplied, carefully packed and shipped, by ALFRED WILLIAMS,
Depositary, Raleigh, N. C.

Teachers and Educators generally are respectfully invited to correspond with
C. W. LAMBETH,
Agent for the Publishers
and Sup't of Introduction.

From Dr. WM. B. HARRELL, Prin. High School, Snow Hill, N. C.:

SNOW HILL, N. C.

"I am much pleased with both the Spellers and all the Readers; and as to the series of Geographies by Monteith & McNally, I have long used no others when these could be obtained.

From Rev. ALBERT SMEDES, D. D., Rector of St. Mary's School, Raleigh, N. C.

RALEIGH, N. C.

I have examined the Geographies—Monteith's [No. 4] and McNally's [No. 5] and find excellencies in both, which eminently entitle them to a wide circulation. It is my purpose to introduce Monteith's [No. 4] into my school. I give it the preference for the information which it gives on the subject of Physical Geography. The maps and questions in both works seems to me to be admirable. ALBERT SMEDES.

From J. W. GULICK, A. M., Prin. Male Academy, Goldsboro', N. C.:

GOLDSBORO', N. C.

I find your books are in use in many Schools in this section. The teachers speak in the highest terms of your Readers and Geographies, and of Peck's Ganot in particular. J. W. GULICK.

From Col. WM. BINGHAM, Prin. Bingham School, N. C.

The introduction of so much valuable matter on the subjects of Physical Geography and Geology, and in a form so simple and intelligible, makes it (Monteith's Intermediate Geography) in my judgment, a charming school book.

"We shall introduce Davies' Bourdon, perhaps others of your books."

WARRENTON, N. C.

"Davies' Mathematics" was adopted by me in 1858, and, up to this time, I have examined no works superior to them as a whole.

I have examined, with a view of introduction, "McNally's Geography" [No. 5] and "Peck's Ganot's Natural Philosophy." I consider them most excellent works, and shall put them in my boys' hands, at the earliest period. The Philosophy is truly an enticing work and must meet with universal commendation. J. E. DUGGER.

From W. C. KERR, State Geologist of N. C.

I regard Monteith's Physical and Intermediate Geography as one of the best books of its kind. It has several points of superiority over most primary Geographies; not the least of which, especially in the eyes of the juveniles, will be found in its attractive and very graphic illustrations. Another is the truly wonderful amount of substantial and really scientific information conveyed by these wood cuts, and the concise and lucid descriptions appended. But the chief excellence consists in this, that Geography is here treated from the only true and rational standpoint, viz: of Geology and Physical Geography; so that the learner arrives, by a natural and easy process, at the true conception of the earth as an organized whole; the designed result of successive changes and modifications, under the control of physical laws, constituting a true growth from a chaotic germ through manifold stages of progress, all pointing forward to its destined end as the home of living beings, and finally of man.

I have introduced your National Series of Readers with great satisfaction to myself and to our teachers. We find them to be excellent, just suited to our purpose.

With Davies' Mathematical Series we have been long familiar, and can find no good reason for changing them.

In the Primary Department we have Monteith's Geographies, and in the advanced classes we have introduced Peck's Ganot, with much acceptance. G. D. BERNHEIM.

From Prof. JOS. H. FOY, President Stantonsburg Scientific High School, N. C.

WILSON, N. C.

I have carefully examined the claims of the different Series of School Books most prominent before the public at this time. I have tested the merits of many of them in the school and lecture room, and feel no hesitancy in pronouncing the "National Series of Readers and Spellers" the best with which I am acquainted. I shall henceforth use no others in my school, and I shall furthermore use my influence to secure their adoption into other Seminaries in this section.

I use Davies' Mathematical Series in my school. I consider his works incomparably superior in many particulars, even to Stoddard's Course, which is saying a great deal. In fact, I consider it the highest encomium in my power to bestow.

I use Monteith's Series in my school. They afford a gradual but thorough and systematic progression, from the simplest rudiments of science, up to a development sufficiently exhaustive for all ordinary educational purposes. Their very superior merit has led me to discard ——— which stands next best on the list.

McNally's, the fifth book of the course, is decidedly the *chef d'oeuvre* of Geographies. No competent instructor can examine it for an hour without being struck with its extraordinary merit. J. H. FOY.

GLASS SPECTACLES,

Superior to any other in use—constructed in accordance with the science and philosophy of nature, in the peculiar form of

A CONCAVE CONVEX ELLIPSIS,

Admirably adapted to the organs of sight, and perfectly natural to the eye, affording altogether the best artificial help to the human vision ever invented. Used only by

MORRIS BERNHARDT,

SPECTACLE & OPTICAL MANUFACTURER.

THE ADVANTAGES of these Spectacles over all others are:

1. **They can be worn with perfect ease** for any length of time at one sitting, giving astonishing clearness of vision, by candle or any other artificial light, comfort to the spectacle-wearer hitherto unknown.

2. **How to select Glasses.** It requires professional guidance even when a good article is offered. Dr. Bernhardt not only has the best Glasses that can be found in the market, but carefully examines the eyes of his patients, and gives indispensable advice as to the proper selection of them.

3. **When the eyes ache or pain through** the action of a bright light, such as is reflected from the snow, sunny weather, white paper, and in reading, writing or sewing, or vivid colored bodies; these lenses, by softening the rays, effect a most agreeable sensation and give great relief.

4. **These spectacles are scientifically** adjusted to every case of defective sight with unerring accuracy, whether arising from age, strain, over work, or premature decay, by Dr Bernhardt on a new and exact principle, entirely his own, which has seldom failed to be correct.

5. **After several years of public practice,** adjusting spectacles to patients under every aspect of defective vision, as well as experience in an extensive, long established business in his Optical Stores, both here and in Europe, Dr. Bernhardt considers it a sufficient guarantee of his ability to supply such glasses as are best calculated for the assistance of imperfect sight.

6. **M. Bernhardt, to signalize himself** from the host of pretenders in his profession, with pride submits for inspection, copies of testimonials he has received from medical gentlemen of the most unquestionable respectability and talent in America; also a number of certificates from well known gentlemen of distinction who have used his spectacles—the originals of all which he will be happy to show to those who may request it. The use of any of the following names or certificates hereunto affixed, without an actual possession of the same, would be a forgery, a capital offence, punishable by State imprisonment.

Testimony of Recommendations from Medical Gentlemen, Professors of the highest Opthalmic talent in Raleigh, N. C., and in the Union.

Raleigh, Aug 24, 1869.

I have carefully examined Prof. Bernhardt's Spectacles, and take great pleasure in recommending him to those who, having defective vision, can be made to see more clearly and distinctly by the use of glasses. He has wonderful skill in this respect. The pair he has supplied me with are of Brazilian Pebble, of most superior quality and excellent finish. They enable me to see how to read, or write, at the ordinary focal distance, as clearly and distinctly as I did twenty years ago. I very cheerfully bear testimony both to the Professor's skill and to the wonderful properties of his glasses.

CHAS. E. JOHNSON, M. D.

Raleigh, N. C., Aug. 24, 1869.

I take great pleasure in saying that the Glasses I have obtained (and am now using) from Dr. M. Bernhart are to me a source of greater comfort than any I have previously used; my own experience fully sustaining the testimonials of excellence and commendation which he has received from gentlemen of science, and high character, in various parts of our country.

WM. G. HILL, M. D.

Raleigh, N. C., Aug 24, 1869.

I take pleasure in stating that I have examined the glasses of M. Bernhardt, Oculist and Optician, and think they are of the best material, and constructed on scientific principles. I would advise those in need of glasses to call on him.

Doctor Bernhardt called at my house and exhibited to me his fine assortment of Australian Crystal Glasses, which are of a very superior quality and workmanship. I take pleasure in saying that the glasses I have obtained from Professor Bernhardt are to me a source of greater comfort than any I have previously worn and cheerfully commend them to those who may be in need of glasses.

W. H. McKEE, M. D.

Raleigh, Aug 25, 1869.

After an attentive examination of the various glasses in the possession of Dr. M. Bernhardt, accompanied with his explanation of his mode of preparing and adjusting them, it is with great pleasure I state my belief of his great skill, and of the benefit which those needing glasses must derive from his assistance.

Raleigh, Aug 25, 1869.

Dr. M. Bernhardt, Oculist and Optician, has fitted me with a pair of Spectacles superior to any article of the kind I ever had before. The material is Australian Crystal, the quality of which renders vision very clear and distinct, and enables me to read and write with as much ease as I did ten or twelve years ago. His assortment of glasses is most complete and the finish apparently perfect. I take great pleasure in recommending him to all who need their sight improved. DRURY LACY, D. D.,
Late Pres't. of Davidson College, N. C.

Raleigh, Aug. 26, 1869.

It gives me pleasure to bear witness to the extraordinary value and excellence of the glasses prepared and furnished by Prof. Bernhardt. To those who need artificial aid for their vision he will be of the highest service.

Raleigh, March 28, 1868.

I have examined a large number of the glasses of Prof. M. Bernhardt, and with pleasure certify to their superior excellence. I wear a pair of them and see as perfectly as I could in my youth. They are the best I ever used, and I therefore heartily recommend him to the patronage of the public. JONATHAN WORTH,
Governor of North Carolina.

Columbia, June 19th, 1866.

Sir: I have made a full and satisfactory test of the Spectacles procured from you, and I have the pleasure to say that the glasses are better adapted to my eyes than any I have ever used. The facility with which you fitted the glasses to my eyes, furnished me conclusive evidence of your scientific skill in optics and your thorough experience as an Oculist.

Your attainments in your profession entitle you to the confidence, patronage and gratitude of the public. I have the honor to be,
Very respectfully yours,
JAMES L. ORR,
Governor of South Carolina.

Prof. MORRIS BERNHARDT, Charleston, S. C.

Wilmington, March 31, 1866.

I have examined a number of Professor Bernhardt's Glasses and am now using a pair of them, and take pleasure in testifying that they enable me to see better than any others that I have used, while in his collection there seem to be some adapted to remedy any kind of defect in vision. THOMAS ATKINSON,
Bishop of North Carolina.

The difference between Dr Bernhardt and most Opticians is, according to my observation, that while they pretend to more than they know, he knows more of his business than he professes.

NEW ADS.—We inadvertently omitted yesterday to call attention to the long advertisement of Books, by Mr. C. W. Lambeth, Agent for A. S. Barnes & Co., New York. The Books are on deposit at the Book Store of Alfred Williams, Esq., where they can be purchased, wholesale or retail.

Read the announcement of A. Creech today. As he states in the advertisement, he has goods upstairs, goods down stairs, goods piled on the shelves, on the counter, on boxes, and lying round promiscuously. The stock is large, varied, seasonable, fashionable and cheap, and from "early dawn to dewy eve," the customers are passing in and out, like bees in a hive, taking away packages by the armful, of dress goods, hats, shoes, and a thousand other things ornamental and useful.

Kreth and Weikel, Merchant Tailors, are prepared to furnish the goods and make them up in New York styles, putting a man in the fashion in short time and at moderate cost. They are both clever and punctual men, as all will find who try them.

Auction Sale, Saturday, of Wagons, Bedsteads, &c., by James M. Towles, Auction and Commission Merchant, Wilmington Street.

L. D. Womble has just received a host of groceries of the best quality. Read his announcement of them. His kiln-dried grits are excellent for breakfast.

CONTINUED.—The revival meetings are continued at the churches in this city. At the Baptist Church an unusual interest is manifested, and the altar is crowded with penitents.

PERSONAL.—Hon. Wm. A. Graham arrived in the City last night and is stopping at the Yarborough.

BETTER STILL.—That Beef and Lamb, which Kirkham sold, on Saturday last, was A No. 1, but that which he proposes to have, to morrow, will be better. If you don't believe this, try him. Place: At the old Market House. Hours: From 4 to 9 o'clock, A. M., and from 4 to 10, P. M.

FALLING OF BRICK.—A quantity of brick fell off the top of the wall of Col. Bunting's new store now being erected on Wilmington Street, carrying the scaffold below with them and making a general smash as they went down. Fortunately nobody was hurt.

TURTLE SOUP, will be served at Pepper's to day and to morrow, at 11 o'clock.—Families will be supplied by leaving orders. We saw the "bird" the soup is to be made of, and took his dimensions and weight, which are, length 3 feet 2 inches—breadth 2 feet, weight 124 pounds, and he could easily carry a man on his back.

ROBBERS.—Two men from Fayetteville paper mills, Henry McKreath and Ransom Frazer, were attacked on Fayetteville street opposite the new *Standard* office, about 11 o'clock last Saturday night, by some four or five negroes, who robbed one of them of a pocket book containing his return Railroad ticket; they called manfully for the police, and the robbers ran off without further depredation.

TRINITY COLLEGE.—We have received from the President, the following statistics of the Institution for the present session.

In the School of Latin there are 108 students; Greek 80; Mathematics 142; English Literature 104; Natural Science 100; Modern Languages 45; Metaphysics, Rhetoric and Logic 42; Engineering 4; Divinity 11; Law 18.

In the full classic course for A. B., 78; in course for A. B substituting German and English Classics for Greek, 5; in the course for graduation in A. M., 2; Bachelor of Science 8; Full course in all Schools except Languages, Divinity and Law 18; The remainder in special schools, or preparatory.

UTLEY'S COTTON PRESS.—We went round to Brigg's Factory yesterday, (Thursday,) to see the new "Utley Press" operate in packing cotton. There were a number of farmers and residents of the city present, who all evinced considerable interest in the machine.

The cotton was brought in a wagon and taken from it to the press. There was no race against time in packing the bale, as the inventor, Mr. Utley, who was present, preferred to explain the operation and show the action of the various parts during the process of the packing. We have no doubt, however, that the statement in the published card of Mr. Briggs, in regard to the time in which a bale can be packed, is within bounds.

Every one present, we believe, was thoroughly satisfied that this is the best Cotton Press ever introduced in this section. It is so simple in construction and operation, that the most obtuse field hand could not fail to work it, after seeing one or two bales packed in it.

Our own opinion is that, had we a cotton farm and gin, we would have one of these presses, even if we had to throw aside a new one of any other kind we ever saw.

Mr. Briggs is receiving orders for them almost every day. One was sent off this week to Fayetteville, and he has five or six others nearly completed, which, with a number more, are all bespoke.

Wherever they are introduced they supercede all other presses.

THE WAY JACOB STONE RECOVERED HIS MONEY.—When Isham Brewer was put in jail, on Thursday, on a charge of stealing Jacob Stone's money, while he was asleep in the Railroad tent, His Honor, Mayor Harrison, sent word to the others who slept in the same tent, that he would put every one of them in jail, if the money was not produced by Friday noon.

On Thursday night Ransom Utley came to Mr. Belvin, Overseer of the hands, and told him he thought, if he could get certain articles which he mentioned, he could tell where the money was. The articles were furnished him, and, sure enough, next morning, fifty dollars of the seventy five were recovered, on hearing which, the Mayor had all the parties before him again. Several witnesses were examined, but as Mr Belvin's testimony covers the case, we give it in substance.

"Ransom came to me Thursday night and said he was mighty sorry that uncle Jacob had lost his money, and that he thought, if he had a pack of cards, he could tell where the money was. I sent and got him some cards, and he shuffled them and run them a good while; and after awhile he said he couldn't tell exactly where the money was, but that it was somewhere between the tent and Raleigh, and that he would try again in the morning, and thought he could come nigher to it.

Next morning he said he must have an egg and a straw, and a green switch. I sent and got them for him, and he set the egg down on one end in the dirt and balanced a straw on it. He then began to run the cards again, and after he had run them some time the straw sorter turned round on the egg, and he said he knew where the money was hid. He took the green switch in his hand and held it up before him, and walked on to an old stump about twenty-five yards from the tent, pointed down to the side of it and said the money was hid there, but that it was not all there; some of it was somewhere else, but he had not discovered the place. I told him to look and see if it was there, but he said he could not—that it would "break his conjure" if he took it up before 10 o'clock, but he said I might see whether it was there, if I would put it back and let it stay until 10 o'clock. I scratched in the loose dirt by the side of the stump and found the pocket book with $50 in it. I put it back but kept my eye on it and on Ransom too, till the officer came to bring him here.—We then took the money up."

Mayor.—"Don't you think, Ransom, you could find the other $25, if you had a pack of cards?"

Ransom—"Yes, sir, I think I could."

The Mayor sent and got him a pack, and he took them into another room and commenced running them. After going through the operation awhile, he declared that Isham Brewer, (the man who was first accused) had the $25, and seemed disposed to stick to it.

The Mayor then told him, he must bind him over in a bond of $200 to appear at the next term of the Superior Court, to answer an indictment for stealing Jacob Stone's money; but that if he would tell where the rest of the money was he would let him off with a lighter bond, or perhaps, on his own recognizance.

He stuck out for some time that Brewer had it, but being advised privately by a bystander, that the tale wouldn't do in Court, and that he would be likely to get at least ten years in the penitentiary, he concluded to try the cards again. After running them again for some time, his countenance brightened up, as if animated with most unexpected success, and he announced that he had found it; that it was hid under the floor of the tent.

He was sent in charge of an officer, and, sure enough, the money was found at a spot he pointed out, hid under the floor of the tent.

The Mayor, in accordance with his promise, returned him to Court on his own recognizance, but it is likely the story will have to be repeated before Judge Watts, at the request of the District Attorney.

The Mayor took the best course to recover the money, the loss of which to Jacob Stone, a poor old colored man, would have been a very serious matter, involving all his savings for the last eight or ten months.

The parties are all colored except the witness, Mr. Belvin. Several colored witnesses were examined in reference to the conjuration, and their testimony would be interesting if we could give it as delivered, but this we cannot do.

Ransom has established his reputation as a conjurer among his colored brethren, and no doubt he will make money enough before Court, by fortune telling, to pay his lawyer's fee.

DRIED UP.—We learn from the *Standard* that Dodd's Spring has dried up. What will the Local now do for a place of resort?

THAT OX.—The *Standard* Local found an ox in the market named "Harvey," and he and Parrish tried to buy him. Good thing they failed, for the Scripture says "Ye shall not yoke the ox and the ass together."

We should have mentioned some days ago that the Goldsborough Daily *Messenger* has recovered sufficiently from the effects of the late fire to make its usual visits, and indeed presents a neater typographical appearance than before.

The Democratic party is daily reminded of its "dead and buried" condition, by the radical press. In view of the recent elections in Kentucky, Virginia, Tennessee, California, Montana and Wyoming, the Democracy are disposed to accept the fact of their "death and burial" with becoming resignation.

"WHICH IS RIGHT?"

MR. EDITOR:—In answer to the inquiry you make in the SENTINEL of the 16th inst., as to which is right, the County Register of Wake County, or the *Standard*, in the statement of the time within which deeds conveying lands and other instruments concerning the same should be registered, I can perhaps, in the absence of the printed laws give you some light. It appears that there were two bills before the Legislature: one fixing the 1st day of October, 1869, as the limit of time in which the instruments referred to should be registered, or be null and void; and another extending the time two years from the ratification of the act. Both were adopted, and received the signatures of the presiding officers of the two houses on the same day, the 10th of April. Nichols & Gorman's Hand Book contains both laws.

The above facts show what a sapient set of Legislators we have.

WASHINGTON, Sept. 23.—Under the caption of "Minister Sickles sustained by the Administration," the *Chronicle* says, in a double leaded leader: "Those officers of the Cabinet who have uttered an opinion, say there is nothing in the communication from Minister Sickles to the Spanish Government to justify the alarm that imperfect disclosures of its contents have created," and concludes:

"Secretary Fish declines to make the note of Minister Sickles public, for prudential reasons, but it is regarded as safe to say that there will be no such thing done as backing down. It is safe to reiterate that the State Department apprehends no warlike results, and will favor a tender of good offices, which having been thankfully declined by Spain a masterly inactivity will be observed. Sickles' injudicious use of words alone it is supposed, caused the hubbub. The text of Sickles' note has not yet been received.

THE UTLEY

COTTON PRESS.

A NEW combination of power, whereby all friction is overcome. The simplicity, economy and durability of this PRESS astonishes all who see it, and the more so that a power so simple should so long have been unappropriated. With this Press, two men can do all the packing or pressing of a 500 pound bale inside of eight minutes; and it can be readily taken down and transported, as it is simple and light. We can supply these Presses cheaper than any yet offered to the Planter. Will send circulars to any desiring, and we would advise all persons wanting presses to withhold buying until they examine this.

THE PRESSES are now being manufactured at the MASS. AND BLIND FACTORY OF THOS H. BRIGGS. All are assured that as between this and any other there is no argument as to its merits over all others. With the irons, any ordinary workman can put them up. The patentee is here for a few days, and will take pleasure in explaining its merits.

THE ÆTNA,	13,41

It has an IMPORTANT NEW FEATURE that has been copy-righted. According to this plan the rates are MUCH LOWER than in any other Company in the world.

Its ratio of Mortality is low. Its rates are very low. Its expenses are very low. Its dividends are large.

It insured more lives in the City of New York in 1868, than any other Company, except one. It issued more Policies in the United States than any other save one. It insured more lives in Canada than any other Company, British or American.

See what the HIGHEST INSURANCE AUTHORITY in this country says. In the June number of the *Insurance Times*, of New York, the following opinion was expressed:

"If there is any great benefit in mutual association, any great advantage to be derived from scientific organization and a chartered source, tending to mitigate the sufferings, lessen the privations, and add to the peace, security, and happiness of humanity, we are prepared to show that these blessings flow, in all their fullness and purity, from this excellent, powerful, and flourishing Company, the ÆTNA LIFE, of Hartford."

"No institution has brought more prompt, full, and grateful relief to the hearths of the bereaved and desolate, and none has been more uniformly distinguished for the enterprise, wisdom, and equitable liberality with which it has fulfilled the purposes of its formation."

"Its success has been almost unbounded and beyond all precedent. Eight years ago, in 1861, it issued only 58 policies, received an income of twenty-eight thousand dollars, and possessed net assets amounting up to something over two hundred and eighty-one thousand dollars; but last year, 1868, it granted 13,337 new policies, more than any other Company except the Mutual Life; received an income exceeding six million dollars and had amassed solid, securely and profitably invested net assets amounting to over Ten Million Three Hundred and Fifty Thousand Dollars. And this wonderful ratio of growth has been sustained in 1869."

[From DeBow's Review for August.]

SOUTHERN ARTS DURING THE WAR.

When the war came, those of us who went into the field and fought for State rights were "heinously unprovided" with the means of warfare. Virginia had 1800 musket caps to begin the war with. The theory was that the world would break into the ports of the South to get cotton, and would thus bring us arms and every thing else that we needed. The organization of the Southern ordnance department was a most remarkable development of unknown resources. Men came forward who were never known in politics. They organized foundries and cast guns, shot and shell. They explored the country for saltpetre, and manufactured all the combustible combinations for modern explosive and fixed ammunition of every kind. To Gen. Gorgas and to Leroy Broun, Esq. (before the war, and now, a father of youth) is the South indebted for almost all their war material which was not imported.

The state of arts in the South was pitiable. At the first hotel in Richmond there were scarcely two cups or plates of the same pattern. Glass ware in the hands of the darkies had no show, and we have constantly seen in the best society invalided goblets supported by a tin or wooden foot. We have paid about $200—when Confederate money was about at its best—for an imported kipskin large enough to make two or three pairs of ladies' shoes. The sole leather would come to, perhaps, as much more. To supply the absolute destitution of glass, an association was formed for its manufacture. The first difficulty was the clay for crucibles. Thousands of dollars were expended in experiment. There was no clay suitable, except in a distant and inaccessible part of Western Virginia. This crucible clay was to be imported from Germany. It must run the blockade. In the meantime the glass we manufactured would all have made green goggles for purblind people.

Another essay was the production of earthenware. This filled the bill precisely. It was of the earth, earthy. The utensils were as red and as coarse as ordinary brick. In respect to cloth it was the same thing. Georgia, which sent gallant men and gave food and cloth to the Confederacy, Georgia had always been stigmatized as Yankee.—Georgia and North Carolina made some goods suitable for female apparel; but, to this day, there is not a yard of cotton prints—except the white and black plaids, called Allemands, in North Carolina—made in the whole South. What then was the condition of the poorer classes, who lived in the mountains and had no relations in the blockade, quartermaster, or commissary departments? Every country store had been cleaned out. The common people were in need of everything that a civilized people had been taught to use. The impolicy of the South in not having opened its own railroads left us without the means of communication. We could not build a locomotive, nor make, nor even re-roll, a rail within the States of Virginia, Mississippi, South Carolina, or Tennessee. Owing to the same impolicy there was for a long time past but one through rail connecting the Confederate States. It was the coast line subject to be cut by any naval expedition. It required nearly three years to complete forty miles of road to connect the South Carolina and Virginia railroads. It was by that Road the Confederate Government escaped capture. With coal suitable for smelting, and iron ore of the best quality lying in immediate juxtaposition in Alabama, they were wholly unavailable for want of development and transportation.

[From the Linden Globe.]

AN INGENIOUS INSTRUMENT.

One of the most remarkable objects at the recent meeting of the mechanical engineers at Newcastle was the new chronoscope, for measuring the velocity of a projectile within the bore of a gun, the invention of Captain Andrew Noble late Royal Artillery, now of the firm of Sir William Armstrong & Co. This wonderful instrument is capable of measuring portions of time so minute that the human mind is as unable to realize them as it is to grasp ideas of infinity. To most of us a second of time seems to pass very rapidly, and a clock denoting tenths of seconds is looked upon as a most accurate instrument. What shall we say, then, to a machine capable of dividing the second into a million parts!—to an instrument, where the inaccuracy of the thousandth part of a second would be a greater comparative error than the loss or gain of an hour a day by an ordinary watch? The chronoscope consists of six brass disks, each 36 inches in circumference and about ¼ inch thick. These are firmly secured to a spindle or axle, which is geared to a train of wheelwork, the whole being driven by a weight something similar to a clock weight. Each wheel travels five times as fast as the one immediately preceding it, so that a very rapid motion of rotation is imparted to the disks, the rate of speed being measured by a clock or stop-watch attached to one of the slower moving wheels. When the instrument is in full spin, the disks are revolving at a rate of about 28 times in one second, and as they are 36 inches in circumference, an inch of disk corresponds to about the thousandth part of a second, the tenth of an inch to the ten thousandth part of a second, and the thousandth of an inch to the millionth of a second. The instrument is provided with a graduated scale vernier and magnifier, by which the thousandth of an inch is read off. The passage of the shot in the bore of the gun is recorded on the edge of each disk by a tiny electric spark derived from a Ruhmkorff coil.—A brass discharger is fixed in an ebonite plate opposite each disk, wires pass from this through an electric battery and coil to the gun, where they communicate with the interior of the bore by means of screw plugs in the side of the gun. The shot cannot pass out of the bore without cutting the wires thus communicating with the inside, and as each wire is cut, a spark is emitted from a discharger, and the edge of the corresponding disk receives a mark on some prepared paper with which it is covered. Thus, let us suppose the gun to be fitted with six plugs, each two inches apart, the first being in such a position that when the gun is loaded the front part of the shot just touches the first wire. The instant the gun is discharged the shot begins to move, and so breaks the first wire and marks the first disk; it then breaks the second wire, and marks the second disk, &c., &c., until it finally breaks the sixth wire, and marks the sixth disk. White, however, the shot was passing from the first to the sixth wire the instrument was revolving, and the sparks, instead of being in a straight line on the disks, will appear in *echelon*, the distance between each of them corresponding to the time taken by the projectile in passing from wire to wire. This most ingenious instrument has been in use for some months at Woolwich, and will be extensively used by the special committee on explosives during their experiments on the pressure of fired gunpowder of various descriptions in the bores of heavy guns.

Gov. McClurg, of Missouri, intends to send another expedition after the outlaw, Hildebrand.

For the Sentinel.

At a meeting of the Directors of the North Carolina Real and Personal Estate Agency, held on the 31st day of August last, I was elected President. On the next day a drawing was advertised to take place on the 19th day of November, 1869, and my name published as President. This advertisement was made without consultation with me, and before the affairs of the Company had been looked into. Upon examining into them, I discovered that the assets were not sufficient to justify the announcement, and I immediately called a meeting of the Stockholders for the 16th day of September. At the meeting of the Stockholders on that day, I stated the condition of the affairs of the Company, as well as I could ascertain them from the books as I found them. The following resolutions were therefore adopted:

Resolved, That the President appoint a Committee of three to examine the books and papers of the Company, and ascertain, if possible, what disposition has been made of its funds.

The Committee under the resolution reported that they had not sufficient time for a thorough examination, and offered the following resolution:

Resolved, That the President be directed to employ two competent men to examine thoroughly into the affairs of the Company; to ascertain and report what disposition has been made of its funds; to put its present books into the best possible condition, and to open a new set of books upon such a system as shall secure the affairs of the Company from confusion hereafter.

This was amended so as to allow the President to appoint a third person, to be employed for not more than five days; and thus amended, passed.

The Chairman of the Committee also offered the following:

Resolved, That the thanks of the Stockholders are due, and are hereby tendered, to R. G. Lewis, Esq., Treasurer of the Company, for the faithful manner in which he has discharged his duties.

This was adopted, and it was then further

Resolved, That the Board of Directors be requested to make an assessment of three per cent. upon the stock of the Company, to be paid as follows: one per cent. within 15 days, and two per cent. on the 15th of October next.

Resolved, further, That the Stockholders who have already made payments of cash upon their stock, be allowed credit to the amount of such payments, upon this assessment, and if this assessment be not sufficient to meet the liabilities of the Company, the Board of Directors shall increase the assessment until it be sufficient.

Resolved, That the President is hereby requested to enquire into the matter of money paid to J. G. Hester, the late President, at Wilmington, for tickets and stock sold there, and to require the said J. G. Hester to pay said money to the Treasurer, or to account for it.

After the adjournment of the Stockholders, a meeting of the Board of Directors was called for Saturday the 18th inst. At this meeting, the following Directors, with the President attended: Robert G. Lewis Esq., and Messrs. J. G. Hester, J. C. Hester and Wesley Whitaker. After the proceedings of the Stockholders were read, R. G. Lewis Esq., offered the following resolution:

Resolved, That an assessment of three per cent, on the stock sold, be made—that one per cent of the same be paid on the 1st of October, one per cent on the 15th of October, and one per cent on the 30th of October.

Resolved, Further, that the Stockholders who have already made payments of cash upon their stock, be allowed credit to amount of such payments, upon this assessment. Mr. J. G. Hester moved to amend by striking out all after the words "20th of October," and inserting the following:

Resolved, Further that the provisions of this resolution shall not apply to the stock sold by the late President in Wilmington, upon which 10 per cent was paid." This was accepted by Mr. Lewis, and the resolution, after discussion, passed.

The public can see from this action of the Stockholders, as well as of the Directors, that steps are being taken to raise money sufficient to place the Company upon a sound footing. I assure the public that every proper means in my power, as an individual, and as an officer of the Company, will be resorted to, to put right the affairs of the Company, and save those who have taken tickets from loss. No scheme will be advertised until this is accomplished, and then parties holding tickets can have the option to take money or exchange them for others. I feel a deep personal interest in the getting of the affairs of the Company straight, in addition to the interest I feel as an officer. My name was connected with it as one of the supervisors after the first drawing. While so acting I had no interest in the Company, and my only duty was to see that the drawings were fairly conducted, and I can assure the public that they were.

Very recently, before my election as President, I purchased some stock, but never knew anything of the financial condition of the Company until after my election.

WHY IS IT BEST TO INSURE
IN THE

BROOKLYN LIFE?

BECAUSE,

AMONG OTHER REASONS, IT IS THE ONLY COMPANY IN THE UNITED STATES WHICH PRESENTS THE GREAT FEATURE OF GUARANTEEING DEFINITE

CASH SURRENDER VALUES,

IN CASE A POLICY IS FORFEITED FOR NON-PAYMENT OF PREMIUM.

ALL POLICIES

Are non-forfeitable after two full Annual Premiums have been paid.

The policy-holders of this Company may travel or reside where they choose—anywhere on the Globe.

The BROOKLYN LIFE has paid, and now pays to its policy-holders, LARGER DIVIDENDS than ever before paid by a Life Insurance Company.

DIVIDENDS ARE PAID IN CASH,

or applied to the permanent increase of the policy, or left with the Company to accumulate at interest, in either way, at the option of the policy-holder.

Proposals for Brick.

SEALED PROPOSALS WILL BE RECEIVED by the Commissioners to erect the Penitentiary, for four millions of brick to be delivered on the grounds of the Penitentiary near the City of Raleigh. One million to be delivered by the first of January; one by the first of April; one by the first of June, and the other by the first of September, 1870. The brick to be 8x4x2½ inches, when burnt, and of such quality as to be approved by the Assistant Architect and Superintendent. The Commissioners reserve to themselves the right to reject any or all bids as unsatisfactory. Payment will be made on the delivery of each half million of approved brick. Bond with approved security will be required for the fulfilment of contracts. The bids will be opened at the City of Raleigh, on the 29th of September, 1869. ALFRED DOCKERY,
